

SILVER / WHITE RANGE

Geoppearl® I silver / white effect enhancing pigments offer pearlescent effects in a combination of lustre, reflection, brilliance and transparency. These pigments are based on mica flaked substrates which are coated with titanium dioxide.

Geoppearl® I silver / white pigments vary in lustre from silky and smooth to twinkling, depending on the particle size distribution.

Geoppearl® I pearlescent pigments give an unprecedented styling potential. Geoppearl® I pearlescent pigments can be combined with conventional pigments to create unlimited coloured effects. These products can be used in a wide variety of products such as plastics (masterbatches), coatings and inks. The Geoppearl® industrial range complies to all relevant regulations and is U.V., solvent and high temperature resistant.
