

## COSMETIC METALLIC RANGE

Geoppearl® C metallic effect enhancing pigments offer metallic pearlescent effects in a combination of lustre, reflection, brilliance and transparency. These pigments are based on mica flaked substrates which are coated with iron oxides.

Geoppearl® C metallic pearlescent pigments offer metallic lustre effects and vary in lustre from silky and smooth to glittering, depending on the particle size distribution.

Geoppearl® C pearlescent pigments give an unprecedented styling potential. Geoppearl® C pearlescent pigments can be combined with conventional pigments to create unlimited coloured effects. These products can be used in cosmetic applications. The Geoppearl® cosmetic range complies to all relevant cosmetic regulations and is U.V., solvent and high temperature resistant
